

Maven Central Repository

This documentation is for those that need to use or contribute to the Maven `central` repository. This includes those that need dependencies for their own build or projects that wish to have their releases added to the Maven `central` repository, even if they don't use Maven as their build tool.

⚠ **Discontinuing support for TLSv1.1 and below as of June 15th 2018** (<https://central.sonatype.org/faq/tls-info/>) and **Discontinuing support for HTTP** as of **January 15th 2020** (https://central.sonatype.org/news/20190715_http_deprecation_update/)

- Maintaining your Metadata ([../project-faq.html](#)) - Information for third-party projects
- Guide to uploading artifacts ([../guide-central-repository-upload.html](#)) - How to get things uploaded to the central repository
- Fixing Central Metadata ([../central-metadata.html](#)) - How to fix issues in content already uploaded

See also the Introduction to Repositories ([/guides/introduction/introduction-to-repositories.html](#)) and Repository Layout ([../layout.html](#)).
